Lead

Two-tone Beluga and Hotspur Bentley leather and Hotspur stitching – nope, we’re not talking about the interior of the Mulsanne, rather Vertu’s new Signature Touch for Bentley smartphone...

This is the third such product to emerge from Vertu’s and Bentley’s five-year partnership, on the back of the popularity of its previous models, such as the Signature S. The high-quality leather and titanium handset features knurled side keys, a three-dimensional Bentley logo, Dolby virtual surround sound and a dedicated concierge service. Available in a range of eight leather colours (with 16 different stitching options), the Signature Touch’s leather exterior can be personalised to match the interior of a customer’s car. It will also include a dedicated Bentley app, delivering exclusive Bentley content.
