'Paris versus New York: A Tally of Two Cities'

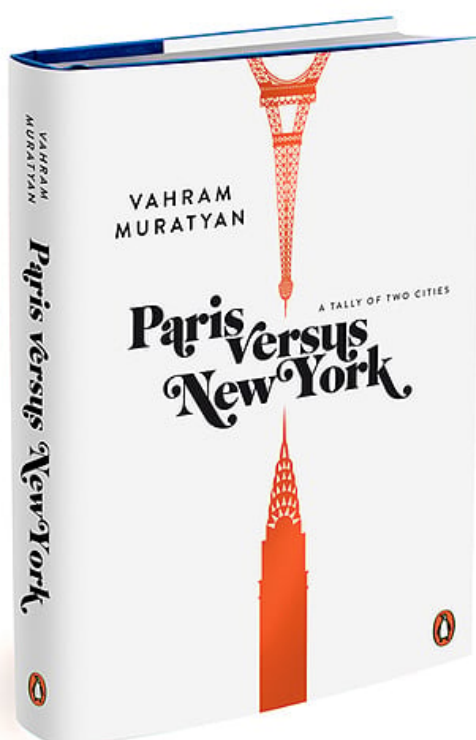

Lead

Freelance art director and graphic designer Vahram Muratyan's blog about living in two of the world's most exciting cities took the online community by storm. You can read it in beautifully illustrated book form.

Comparisons and similarities abound. Montrachet or Martini? Bagel or baguette? Essential choices for the transatlantic traveller, both - and well-considered in the 224-page, English-language book.

And Americans who have crossed the Atlantic divide, such as Hemingway and Gene Kelly, are given due mention, too.

The one question unanswered is whether Muratyan prefers one city over the other.

Paris versus New York: A Tally of Two Cities is published by Penguin Books in hardback, priced \$20.00.
