## [Ferrari's limited-production F60America commemorates six decades in the States](#)

### Lead

Ferrari has announced the F60America, a limited-edition V12 roadster built to celebrate the marque's sixth decade in the United States. Just 10 examples will be produced...

Based on the [F12Berlinetta](#), the new car pays homage to Luigi Chinetti's vision of importing specifically altered [Ferraris](#) to the U.S. market. A V12 engine and open-top driving were highest on the list of demands of 50s and 60s Americans - and it seems little has changed since then. Much like the [Ferrari 275 GTB/4\\*S N.A.R.T. Spyder](#) of 1967, the F60 will be limited to 10 examples, all of which have already found homes with Ferrari's most valued Stateside clients.

Mechanically, the F60 is identical to the F12 - but as was the case with Chinetti's coachbuilt originals, the car has been given a new outward identity. A new 'diapason' design theme sees every panel re-sculpted (albeit incorporating Ferrari's aerodynamic and identity requirements), with the striking result finished in classic N.A.R.T. livery. The 'light fabric top' is effective below speeds of 75mph.

### Further historical references

Inside, the asymmetrical cabin colours reference [Ferrari's historic competition cars](#), although there are modern composite materials aplenty. Additional commemorative flourishes include a stylised American flag motif on the centre of each seat and backrest, and a Ferrari 60th anniversary Prancing Horse motif adorning the transmission tunnel and front wings.
