## [The Mercedes G500 4x4<sup>2</sup> is actually a 6x6 minus two \(wheels\)](#)

### Lead

At the Geneva Motor Show, Mercedes will officially reveal the 'little' brother of its formidable six-wheeled off-roader: the G500 4x4<sup>2</sup>...

For those without the means to secure an ultra-exclusive G63 AMG 6x6 – or perhaps the need for a third axle – the G500 4x4<sup>2</sup> has arrived to fill the gap between that and the standard [G-Wagon](#). Huge 22-inch wheels and extended Unimog-style wheel arches once again make an appearance, with the increased ground clearance allowing for impressive wading capabilities of around 3ft. Power comes from a 5.5-litre V8 with 422HP.
