When classic cars become subjects of modern art

Lead

These stylish prints depicting popular classic cars are the work of Nick Schulz's design and illustration company, L-Dopa...

A wide range of subjects

The Sonoma County-based artist has put his crisp and modern take on an eclectic range of classic cars, from favourites such as the [Mini](#), to gargantuan American land-barges such as the [Lincoln Continental](#). And he doesn't just illustrate cars – his other series of prints include men's health, travel and leisure, and 'wired'; the latter satirically portraying modern society's obsession with technology.
