[Custom Ducati Scramblers are exactly what friends should be for](#)

Lead

Where's the fun in riding on your own? When Bryan Fuller of custom car and motorcycle builder Fuller Moto decided to build a custom Ducati Scrambler on which to ride around Atlanta, he built another for a friend to ride alongside him....

From the ground up

The fabulous dirt bike you're looking at is 'Super Duc', which follows the near-identical 'Dirty Duc' as the second of [Fuller Moto's](#) pair. It's based on a 1960s Ducati 250 Scrambler, and was built meticulously by hand from the ground up. Distinguishing features include the centre-mounted twin rear shocks, vintage Ceriani forks, and the hand-shaped headlight surround and tailpiece. Topping the bike off is an Italian-themed colour scheme in honour of the Ducati's roots.
