## [Sit back and vent in the Porsche 356-inspired rocking chair](#)

### Lead

For those who can't afford to keep a Porsche 356 Speedster in their study - whether for spatial or financial reasons - this limited-edition chair could be the perfect answer for the aircooled enthusiast...

### Aircooled seating

Designed exclusively for the Luftgekühlt Porsche celebration held at [Modernica's](#) Los Angeles premises earlier this month, the Aircooled Arm Shell rocker chair is a collaborative effort between the American furniture maker and [Deus ex Machina](#), best known for its custom motorcycles. Penned by the latter's in-house designer, Carby Tuckwell, it incorporates the vent hole pattern of a naked 356 Speedster seat into its Eames-inspired glassfiber body, using the same processes and machines originally used in the 1950s. Only 50 examples of the limited first-edition Aircooled chair will be produced, and at the time of writing there are still a few available from the [Deus ex Machina shop](#).
