## Zenith’s new Chronomaster El Primero is the perfect companion for the Tour Auto

**Lead**  
Whether participating in the tricky regularity or all-out competitive class, Zenith’s new Chronomaster El Primero Open Tour Auto Edition is just the timepiece to accompany you on the weeklong journey through France...

### Every little helps

Zenith’s third edition in honour of the Tour Auto, the Chronomaster El Primero Open Tour Auto pays tribute to the great French historic motorsport event, with the Tricolore of blue, white, and red flowing seamlessly from the matte slate grey dial to the slate grey bracelet. Comprising 282 components, this automatic chronograph features a 42mm stainless steel case housing a stunning movement beating at 36,000 half-oscillations per hour. With its domed glass and anti-reflective sapphire crystal, the glare from the (fingers crossed!) French sunlight certainly won’t stop you from tracking your lap times or those all-important regularity trials.
