## LA's Petersen Museum hosts biggest-ever exhibition of sci-fi vehicles

**Lead**  
'Hollywood Dream Machines: Vehicles of Science Fiction and Fantasy' at the Petersen Automotive Museum in Los Angeles is a fascinating new exhibition chronicling the vehicles that have captured the imaginations of millions in cult classic films and video games...

### Very Important Vehicles

The largest museum exhibition of sci-fi vehicles ever held, *Hollywood Dream Machines: Vehicles of Science Fiction and Fantasy* at the Petersen Automotive Museum comprises 40 fantastic and futuristic vehicles and corresponding artworks, props, and costumes from some of the most popular films (and video games) of all time. Think Dr Brown's DeLorean time machine from *Back to the Future*, the Audi RSQ from *I-Robot*, KITT from *Knight Rider*, or the wild 'Luv's Spinner' from *Blade Runner 2049*. Rather appropriately, the Petersen has teamed up with Microsoft to add a further dimension to the exhibition with the 'World's Imagined' HoloLens, a mixed-reality experience that will highlight a selection of these iconic vehicles like never before. If you're heading to Tinseltown before March next year, we'd thoroughly recommend swinging by the Petersen and checking this exhibition and the rest of the superb museum.
