

CLASSIC DRIVER

Put the pedal down in style with the Duke + Dexter Ritchie Sneaker

Lead

With seemingly every sneaker company under the sun designing their shoes for the 1% of the population who can run a 4-minute mile, Duke + Dexter's comfort-first approach with their Ritchie Sneaker is a breath of fresh air.

Here at Classic Driver, we like to reserve high speeds for when we're behind the wheel, not on foot, so when we heard Duke + Dexter's Ritchie Sneakers encouraged you to take things slow, we knew they would be a perfect fit for [the Classic Driver Shop](#). Proudly designed for the stroll, not the sprint, the Ritchie Sneakers are the ideal companion to help you take things slow this summer. With their custom-designed sole engineered for supreme comfort, zero stitch internal heel, and a breathable tech mesh upper, this is as close as you'll get to walking on a cloud without exiting your next flight to the Balearics above a cumulonimbus.

However, Duke + Dexter's relaxed attitude certainly doesn't carry over to the construction of their shoes. Handmade in England using Italian suede for the exterior and Italian leather lining, Duke + Dexter have managed to eliminate 94% of all wastage by producing extremely limited runs and recycling components wherever possible.

If the two-tone look isn't for you, or if you prefer you like your sneakers with a little extra leather, then you'll be pleased to know that there's a Ritchie Sneaker colour way for any occasion, ranging from full white leather, to all-black suede. Whichever you choose, you can leave the house knowing that your fresh kicks aren't needlessly kicking animals out of their natural habitat. Take a look below at the full Duke + Dexter Ritchie Sneaker collection, so that on your next holiday your feet get as much of break as you do.
