

CLASSIC DRIVER

Ride into the sunset with one of these 10 unconventional dream bikes

Lead
Spring is just around the corner. So we have picked our favourite ten custom motorcycles and contemporary superbikes from the Classic Driver Market.

It's an age old problem: you have new car money burning a hole in your pocket, but four-wheeled motorised vehicles just don't do it for you. Luckily, there has been no better time to be an affluent biker than right now, and the Classic Driver Market is bursting at the seams with motorbikes that make a strong argument for two wheels being better than four. If there's one area that's absolutely not up for discussion where bikes beat cars, it's power-to-weight ratio. Take the [2014 Ducati 1199 Superleggera](#), for example, which packs a frightening 200bhp into its featherweight 166kg frame. Otherwise, if travelling at light speed isn't for you, then why not try John Wick's bike of choice - this [2020 ARCH KRG1-1](#). No matter your favourite style of motorcycle, the Classic Driver Market will have something for you, so take a look below at the ten bikes that caught our eye.

Start the new biking season with these mean machines
