Want to experience some of the most dramatic scenery and best driving roads in the world? Curves Norway is your indispensable guide to the main attractions and hidden gems along the Norwegian road network.

International driving road super sleuth Stefan Bogner is back with another must-have edition of Curves. This time the focus is on the Kingdom of Norway, and Stefan has climbed every pass, forded every fjord, and taken to the skies to produce the ultimate guide to the land of the vikings.

Much like the Northern Lights, Trolltunga, or elks, the scenic roads (known as turistveg) and the Trollstigen are often listed among Norway’s greatest attractions. Rivalling some of the best roads anywhere in the world, Norway is a veritable playground whether you’re exploring by bike or sports car, but there’s much more than just great drives to enjoy in Norway. In Curves Norway, Stefan provides top-tier suggestions for driving routes as well as an exhaustive list of the best restaurants to ensure your next Norwegian road trip is as good as it could possibly be.
